

SOLAR HEAT & UV REFLECTIVE TECHNOLOGY! BETTER THAN NEW, GUARANTEED!

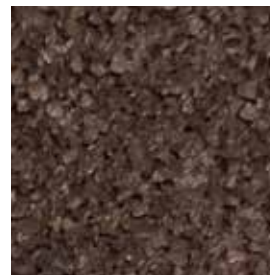

SHINGLETEK "COOLSEAL" colors are IR solar reflective and reflect damaging UV rays, reduce heat transfer through the roof and save on energy consumption by lowering surface temperatures. Using the SHINGLETEK formula with the COOLSEAL Technology increases waterproofing by 80%, resists mildew, mold, and moss, and increases granule adhesion by over 100%. This is a huge "Game Changer" in the roof restoration industry allowing your roof to be restored to "Better Than New" quality and performance in just a few hours. Consumers can now transform their roof's appearance, saving money by eliminating the high cost of re-roofing. Call your local certified exclusive dealer today.
